Senior Product Designer, Lendflow

Jun 2024 – Present

- Design core interfaces for funding advisors and underwriters on a B2B embedded lending infrastructure platform
- Designed a command interface that made it possible to invoke AI agents, including one specifically for email, which helped cut manual inbox handling by **61%** and first-response time by **67%**
- Own design end-to-end (research, prototyping, UI, and developer handoff), using Claude, Cursor, and Granola to speed up concepting and analysis
- Build interactive prototypes instead of static screens to walk through complex flows
- Expand and modernize an outdated design system alongside developers
- Maintain the product's visual and marketing consistency, including campaign work
- Drive day-to-day stakeholder communication and align product strategy with PMs and engineers

Senior Product Designer, Glow Design Agency

Mar 2023 – Present

- Designed end-to-end B2B SaaS products in fintech and workplace management within cross-functional teams, balancing business goals and user needs
- Redesigned existing features and created new ones, improving usability and driving conversion at the booking and onboarding stages
- Conducted user interviews, usability testing, and card sorting to uncover pain points and validate design decisions
- Evolved the design system and selected handoff tools for smooth implementation by developers
- Created documentation and used coding tools to demonstrate feature functionality
- Tracked analytics and user behavior to improve experiences and drive feature adoption

UX/UI Designer, AppCake

Jun 2022 – Feb 2023

- Built cross-platform mobile applications for iOS, Android, and Unity, and redesigned apps across utilities, game guides, and health categories
- Created App Store and Google Play assets, including feature banners, app screenshots, subscription onboarding screens, and application icons
- Contributed to a **7.5%** improvement in user engagement

UX/UI Designer, Adept

Oct 2021 – June 2022

- Shipped B2B and B2C foodtech products, managing end-to-end UX from discovery to launch
- Redesigned a web-based coffee ordering app and developed internal admin tools, reducing order handling time by **12%** and increasing operational visibility
- Built inventory-aware ordering and marketplace integrations that reduced product waste by **8%**
- Contributed to the creation and scaling of a shared design system, improving cross-product consistency

UX/UI Designer, ULTIMA

Mar 2021 – Oct 2021

- Developed marketing creatives for social networks that increased sales conversions
