Senior Product Designer, Lendflow

Jun 2024 – Feb 2023

- Designed product experiences for an embedded credit infrastructure connecting and automating lending for brands and lenders, across web for three distinct user roles
- Built a unified deal tracking system spanning deal analysis and communications, replacing scattered, disconnected views used by operational teams, capital partners, and borrowers
- Designed the interface for AI agent workflows, moving repetitive manual steps inside the product and reducing the need to switch between tools for funding advisors and underwriters
- Scaled a design system adopted across product teams, and integrated AI into the design process to validate ideas before engineering involvement

Senior Product Designer, Glow Design Agency

Mar 2023 – Feb 2023

- Designed onboarding and activation flows for a proptech product, replacing a multi-step signup with a single guided flow across web and mobile
- Redesigned the search and booking flow end to end, removing redundant steps between finding a listing and confirming a booking
- Built enterprise admin tools giving internal teams a single interface for processes previously handled through manual, disconnected steps
- Conducted interviews and usability testing to validate design decisions before development
- Used AI tools to build prototypes and test solutions before committing engineering time

UX/UI Designer, AppCake

Jun 2022 – Feb 2023

- Built cross-platform mobile applications for iOS, Android, and Unity, and redesigned apps across utilities, game guides, and health categories
- Created App Store and Google Play assets, including feature banners, app screenshots, subscription onboarding screens, and application icons
- Contributed to a **7.5%** improvement in user engagement

UX/UI Designer, Adept

Oct 2021 – June 2022

- Shipped B2B and B2C foodtech products, managing end-to-end UX from discovery to launch
- Redesigned a web-based coffee ordering app and developed internal admin tools, reducing order handling time by **12%** and increasing operational visibility
- Built inventory-aware ordering and marketplace integrations that reduced product waste by **8%**
- Contributed to the creation and scaling of a shared design system, improving cross-product consistency

UX/UI Designer, ULTIMA

Mar 2021 – Oct 2021

- Developed marketing creatives for social networks that increased sales conversions
